

BUBBLE POND

Materials:

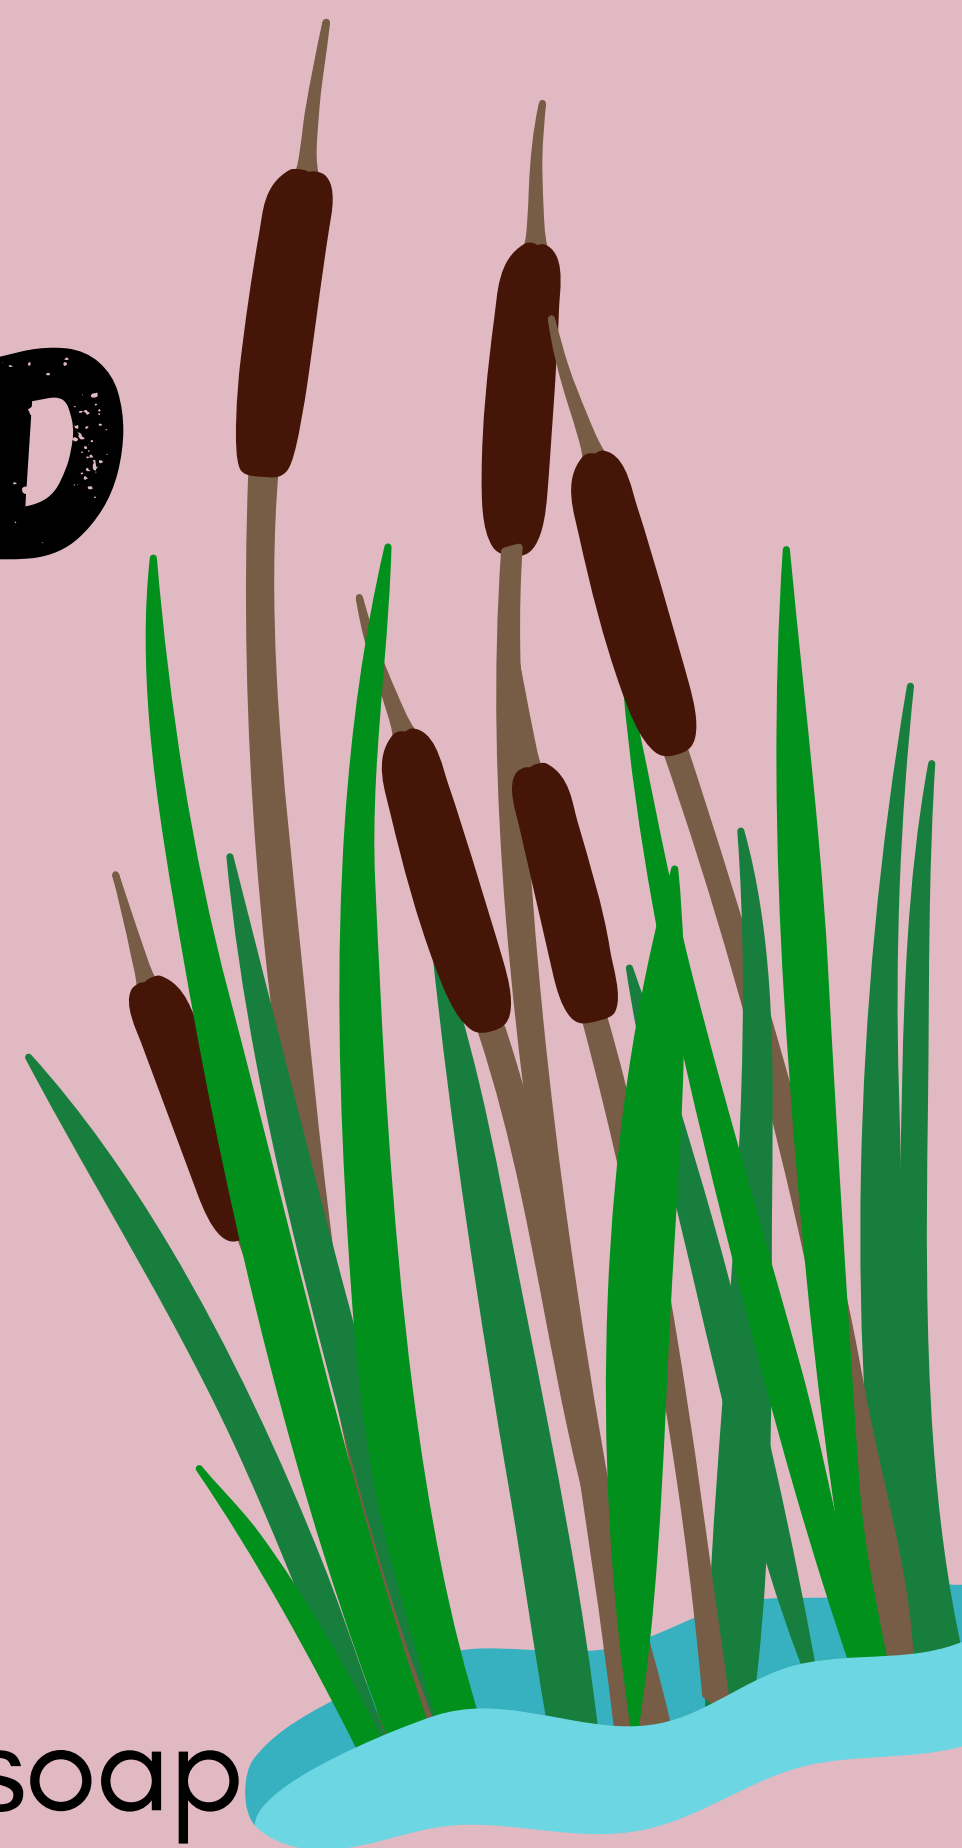

Water

Food coloring

Sensory Bin

Whisks

Dishwashing detergent or hand soap

A bubble pond sensory bin gives you the opportunity for your imagination to run wild - it's a great way to develop your language, cause and effect and fine motor skills. Children can learn about the different plants and animals that live in ponds. They also get to create the bubbles by whisking the soap in the bin.

Watery sensory activities can be done outdoors or indoors! if you don't want to add water you can use water beads, Sand, or black Raw Beans.
